## **Mark Geoghegan Wins Best Paper Award at the 2000 International Telemetry Conference**

Cincinnati, Ohio, November 18, 2000 – A senior communications systems engineer with Nova Engineering, Inc. has won the Best Paper Award at the 2000 International Telemetry Conference in San Diego.

Mark Geoghegan's paper "Improving the Detection Efficiency of Conventional PCM/FM Telemetry by Using a Multi-Symbol Demodulator" was one of over 100 papers presented during the conference.

The International Telemetry Conference (ITC) is the only nationwide annual conference dedicated to the subject of telemetry. This conference primarily consists of the presentation of technical papers. Manufacturers also exhibit equipment, techniques, services and advanced concepts. Tutorial courses are also offered at the conference. To complete a user-supplier relationship, each ITC often includes displays from major test and training ranges and other government and industrial elements whose mission needs serve to guide manufacturers to tomorrow's products.

Other papers presented by Nova Engineering included "Description and Performance Results for the Advanced Range Telemetry (ARTM) Tier II Waveform," and "An Enhanced, Constant Envelope, Interoperable Shaped Offset QPSK (SOQPSK) Waveform for Improved Spectral Efficiency."

As Terry Hill the president of Nova Engineering said, "This award is quite an honor for Mark, and it certainly reflects well on the rest of Nova Engineering. Nova is becoming well established in the telemetry arena."

For a copy of the winning paper or other whitepapers, please contact Nova Engineering or visit our website.

**About the Company:**

Nova Engineering is a 100% employee owned wireless and digital communication products and services company based in Cincinnati, Ohio. In ten years of operation Nova Engineering, Inc. has pioneered a variety of leading edge projects in both the government and commercial sectors.

Nova Engineering's products include: mobile wireless routers, data communication product development hardware and software, custom RF communications equipment, and high performance modems.

Nova Engineering supports the total development cycle from systems engineering, analysis and computer simulation to printed circuit board design, prototyping, production, and automated testing.

For further information about Nova Engineering, Inc. call 1-800-341-NOVA, 1-513-642-3000 or email [info@nova-eng.com](mailto:info@nova-eng.com).
